

100% NATURAL

Today, as in the past: **Natural. Alkaline.**

Nothing was really known about the so-called acid mantle in earlier times. The amniotic fluid surrounding the fetus is consistently alkaline. Likewise, newborns do not have an acid mantle – it is only formed as they grow up. Our ancestors already knew this, which is why it was quite natural for them to clean themselves using alkaline products. Other great cultures, such as that of the Egyptians, also bear witness to the knowledge of alkaline body care. For example, the Egyptians used to bathe in Lake Natrun, a soda lake, to regenerate.

For good reason: **ANACOS.**

With **ANACOS SANUSLIFE** has created a natural cosmetics range with a high alkaline value. The aim of this range is to neutralize, dissolve, excrete and gently treat harmful substances through the sweat and sebaceous glands using sufficient, quality minerals, alkaline baths and alkaline cosmetic products. Thus guaranteeing and supporting the skin's constant regeneration process. All quality products are characterized by natural ingredients of the highest purity, which are also protected from the negative information of electromagnetic fields with the help of Memon technology. The main ingredients of the **ANACOS** cosmetics range are dolomite powder, aloe vera juice, olive oil and evening primrose oil.

**Natural. Packaging.**

It's not just the tubes that are ecologically sustainable in the new **ANACOS** line, but the packaging is too. These are made of „natural cardboard“. Natural cardboard, also called Kraft cardboard, is brown cardboard made of solid board containing recycled fibers. Natural cardboard consists exclusively of natural fibers (primary and secondary fibers) and does not contain any chemical or artificial additives.

# ANACOS

## bath salt

PRODUCT DESCRIPTION

### ANACOS FORMULA FACTS

<b>YES</b> 100% NATURAL CONTENT	<b>NO</b> NUTS	<b>NO</b> SILICON OILS
<b>YES</b> ALKALINE	<b>NO</b> PARABENS	<b>YES</b> SUITABLE FOR VEGANS
<b>NO</b> ALUMINIUM COMPOUNDS	<b>NO</b> PEG	<b>NO</b> SYNTHETIC COLORS
<b>NO</b> ANIMAL BY-PRODUCTS	<b>NO</b> PETRO-CHEMICALS	<b>NO</b> WHEAT
<b>NO</b> ANIMAL TESTING	<b>NO</b> RETINOL	
<b>NO</b> MINERAL OILS	<b>NO</b> PRESERVATIVES	

### THE ADVANTAGES

- Composition of salt and dolomite rock
- Himalayan crystal salt
- Cleansing
- Dolomite with a high degree of purity (99.2%)
- With natural minerals and trace elements such as magnesium, potassium and iron
- Variety of applications, e.g. for various baths, compresses, socks, clothes, massages and face masks
- No alcohol, aluminum, fragrances or any chemical additives
- Suitable for men and women of all ages
- Vegan

### INTO THE TUB INSTEAD OF THE DEAD SEA!

Even ancient rulers are said to have gone on pilgrimage to the Dead Sea for healing bathing cures. It was already known then that the water with its high salt concentration and minerals had positive effects on the body. The knowledge of the properties of these unique baths has been preserved until today. And is still appreciated today. Many pleasure bathers still travel long distances to recuperate by splashing in salty spas.

If you have **ANACOS** bath salt, you don't have to travel long distances. The tub's fine. Just turn on the tap, add a portion of **ANACOS** bath salt to the tub, enjoy a nice bath at home and relax.

**Ingredients (INCI):** Sodium Chloride/Maris Sal, Sodium Bicarbonate, Natrium Hydrogen Carbonate, Silica, Calcium Carbonate, Magnesium Carbonate.

SPECIAL FEATURES...

The special feature in **ANACOS** bath salt is the rich dolomite powder content. The name comes from the French geologist Déodat Gratet de Dolomieu, who discovered the rock in the 18th century. The rock is unique due to its purity (99.2% dolomite with a minimal calcite content). When applied externally, the salt and dolomite mixture can swell the layered mineral flakes with liquid and unfold its cleansing effect fully. This product is equipped with technology that protects the contents from negative information from electromagnetic fields. Developed in collaboration with memon® bionic instruments GmbH.

APPLICATION POSSIBILITIES OF THE ALKALINE NATURAL BATH SALT ANACOS BATH SALT

ALKALINE FOOT BATH

Put 1-2 teaspoons of **ANACOS** bath salt into warm water. Alternatively take an alternative foot bath, alternating warm and cold. Enjoy the foot bath for 30-60 minutes, then let the feet rest in a resting bath for 1-2 hours.

ALKALINE SPORTS SOCKS

One day before sport: Dissolve 2 teaspoons of **ANACOS** bath salt into 0.5 liter of water, briefly soak the sport socks and then let them dry. Wear them the next day for sport. This helps to prevent stiff muscles.

ALKALINE LONG-SLEEVED COTTON SHIRT

Dissolve 1-2 heaped teaspoon of **ANACOS** bath salt in 1 liter of water at body temperature and place the shirt in. Subsequently, you can put the wet shirt on overnight and put 1-2 large, dry shirts on top. The long-sleeved shirt should not be too tight.

ALKALINE HAND BATH

Add 1 pinch of **ANACOS** bath salt in cold water and bathe your hands in it for 3-5 minutes. This gives beautiful well-groomed hands!

ALKALINE SALT COMPRESS

Dissolve 1 heaped teaspoon of **ANACOS** bath salt in 0.5 to 1 liter of water at body temperature. After you have applied the wrap, keep the affected body area warm and dry.

ALKALINE SALT MASSAGE

Put **ANACOS** bath salt on wet skin and massage them in. After application, wash the skin with water or take a shower.

ALKALINE SALT SOCKS

Dissolve 1 heaped teaspoon of **ANACOS** bath salt in 0.5 to 1 liter of water at body temperature. Place a pair of socks into the water, until they are soaked. Subsequently, you can put the wet socks on overnight and a pair of large, dry socks over the top. The socks should not be too tight. If your feet get cold then warm them up with a water bottle.

ALKALINE FACE MASK

Mix and stir 1-2 level teaspoons of **ANACOS** bath salt in a bowl of water at body temperature until a pulpy mass is formed. Apply the mixture, leave on for 5-10 minutes and then rinse off. This is especially recommended for skin problems on the face or body.
